Rocky Mountain BBQ Showdown Official Rules and Regulations

1. The interpretation of all rules is at the discretion of contest officials and judges. The decisions of the contest officials and judges are final.
2. Each team will be designated a space and all equipment is to be stored and all preparation is to take place within the confines of that space. No sharing of cookers or heat sources is allowed among teams. Teams must designate one head cook and may not enter any category more than once under the same team name, or using the same cooker or cut of meat.
3. Cooking media shall consist of charcoal, wood, or wood pellets. Gas or electric heat sources are not permitted for cooking. Gas or electric heat sources may be used as ignition sources, provided the meat is not in the cooker. No open fires, fire pits, or on the ground fires of any kind will be permitted. The use of electric accessories such as forced drafts, spits, or augers are permitted.
4. Teams must provide a minimum of one fire extinguisher with a minimum of a 2A:10BC rating on site before any cooking is started. The fire extinguisher must be in good condition and properly tagged by a certifying agency, or be purchased within the last year- with a receipt available for review by contest officials or fire code officials.
5. Teams must provide all of their own cooking and serving supplies and garnishes. Turn in containers will be provided.
6. It is the responsibility of the team to see to it that their space is kept orderly and clean and to practice food safety and cook in as sanitary manner as possible. Spaces are subject to inspection by contest officials at any time. Each team must abide by these sanitation guidelines:
 - a. All teams must provide a three bin wash system – the first with warm, soapy water, the second with warm water for rinsing, and the last with warm water and added bleach at a rate of one cap full per gallon of water.
 - b. Shoes and shirts are to be worn.
 - c. No use of any tobacco products while handling meat.
 - d. Prior to cooking, meat must be maintained at 40° F or lower. After cooking, meat must be maintained at a temperature above 140° F.
 - e. Meat must be properly cooled reaching a temperature of less than 70° F in two hours, and then 40° F within the next four hours.
 - f. Meat that is properly cooled may be reheated for hot holding to serve, so long as every part of the food reaches 165° F for a minimum of 15 seconds and is held above 140° F for the remainder of the serve time.
 - g. Teams must provide a thermometer to monitor temperatures.
7. All meat is to be inspected by contest officials Saturday morning before cooking can commence. Meat may not be pre-marinated or seasoned, except for labeled, manufacturer-enhanced product without added flavor, with the exception of sausage. All meat must begin raw and be cooked on site. Competition meat not meeting these requirements will not be permitted for turn-in. Once meat has been inspected, it may not leave the grounds.
8. All turn in containers will be provided and labeled using an individual team number. The team number will, after judging, be correlated to a team name for awards. The winners will announced at the awards ceremony to tentatively begin at 4pm Sunday, May 28th.

9. The Grand Champion will be announced at the conclusion of the awards ceremony. The Grand Champion will be determined using the team's four highest category scores. If there is a tie, the tie is to be broken on the fifth category. A team will receive a zero for each category that they do not enter.
